Camo Color – the quick colour service for Men

Camo Color doesn't cover the grey completely, but reduces the amount of grey in a believable way. By gradually building the level of coverage, no one will really notice that you are colouring your hair, but just that you look younger!

You will see more 'pepper' among the salt and pepper.

In just 5 minutes we can blend out a little grey giving a more balanced, younger look. Or 10 minutes will give an increased coverage.

The service is discreet with colour applied quickly and easily, being combed on at either the stylist's chair or in the shampoo area. It does not require covering with foils or processing under heat.

It leaves hair with natural looking results that fade gradually over time.

Camo Color contains ingredients that actually improve the condition of the hair such as protein for strength and quinoa oil for healthy shine.
