

Aftercare for the Permanent Blow Dry.

It is important that the hair is left in its' natural state until you return to us in 4 days. We can only guarantee results if the following points are observed:

Do not get your hair wet until you return to us in 4 days

Do not tuck your hair behind your ears or use your glasses to hold your hair back.

Do not use grips or any other device to hold your hair back.

Do not use any sprays, gels, or any other styling products during the first four days of the treatment as they might affect the effectiveness of the treatment.

After the initial 4 day period, only use only shampoo provided – this will be provided at your 'Follow Up' blow dry appointment.

If your hair becomes wavy during the night or during the four days immediately following the treatment, use a blow dryer or flat iron to straighten the waves.

If your hair does get wet during the first four days, then dry your hair and straighten with a straightening iron.
